PAF Guide

- Clarified the definitions and scenarios below.
 - **List Owner**
 - Person/Company for whom processing will be done
 - The owner of the mail created from this list; the one party in the process that is driving the mail without whom no mailing would occur
 - Is the beneficiary of the NCOALink processing
 - As stated in the Reports section of the License Performance Requirements (9.3.1 – FSP LPR; 8.3.1 – LSP LPR): *Under no circumstances shall a third party Broker, Agent, or List Administrator be considered the Mailing List owner nor have the authority to sign on behalf of the Mailing List owner.*
 - **Broker Agent Processing**
 - Scenario 5**

Jones Hardware Co (Jones') goes to Fred's Mailing House (Fred's) for a mailing to their current customer database. Fred's then contacts Sue's Advertising Agency (Sue's) to design and create the mailpieces. As part of creating the mailpieces, Sue's submits the Jones' mailing list to an NCOALink Licensee. In this case Fred's Mailing House and Sue's Advertising agency are BOTH Brokers. **Jones' is the List Owner.** Under no circumstances should a third party sign for the List Owner.
 - **List Rentals**
 - Scenario 6**

ABC Company provides mailing services to its customers. Customers hire ABC Company to produce, print and mail for them on a regular basis. ABC Company purchases one or more lists from a list broker for unlimited use and uses these lists to mail the customer pieces. The same lists, or portions of the lists purchased by ABC Company are used for multiple Customers who want to mail to these areas. Customers 'never' see the list, never retain a copy of the list or receive any change

Modifications to NCOA^{Link}® licenses and supporting documents:

of address information from ABC Company. ABC Company maintains, updates and manages these lists. Who is the List Owner and who is the Broker?

As ENTIRE list(s) are processed and no updated data is returned to the List Broker. Then ABC Company is the List Owner. There is no Broker. If a List is rented for a specific client/customer, that specific client/customer is the List Owner.

○ Scenario 7

ABC Company provides mailing services to its customers. Any Customer hires ABC Company to produce, print and mail for them on a regular basis. ABC Company purchases one or more lists from a list broker for a 'one-time' or multiple use to create and mail for a specific Customer. This Customer 'never' sees the list, never retains a copy of the list or retains any change of address information from ABC Company. Who is the List Owner and who is the Broker?

Since the list(s) purchase is for a specific customer, that customer is required to sign the PAF as the List Owner, ABC Company would be a Broker if they are not the licensee providing the processing. If a List is rented for a specific client/customer, that specific client/customer is the List Owner.

- Updated the RTDs in document.

User Technical Reference Guide

- Updated to incorporate SHA-256.

January 26, 2016

Service Provider; Combined; Mail Processing Agent; and Interface Distribution RTDs

- Add the following language regarding name presentation: The presentation of name order is established using a pre-process before querying the NCOA^{Link} database. However, there are no restrictions on using a process to interchange the name order to yield the best possible results using the NCOA^{Link} database. It is ultimately the responsibility of the Mailer Owner working with the Licensee to determine the name order presentation correctly.
- The statistics of new address information in the NCOA^{Link} file were updated to the following:
 - 89.68% Forwardable moves containing delivery point confirmed **New** addresses – **New** address provided
 - 1.19% Moves containing unconfirmed **New** addresses – **New** address not provided
 - 7.44% Moved, left no address
 - 1.63% PO Box Closed
 - 0.06% Foreign moves

FSP and LSP LPR

- In sections 9.1 and 9.1.2 (FSP LPR) and 8.1 and 8.1.2 (LSP LPR), added the following new language regarding the alternate PAF method:

9.1, sixth sentence

The USPS does not at this time endorse any particular electronic alternate methods for verification of client identity. Any electronic system that meets these requirements is sufficient. The Licensee will decide what methods best suit their business needs and address their business risk, while still maintaining the appropriate PAF information. Licensee may implement multiple methods for verification based on the Licensee's business needs.

9.1.2, new section and renumbered subsequent sections

In the event the USPS, at its sole discretion, determines a Licensee is not diligently verifying the identity and role all parties involved in the transaction (including, but not limited to, brokers and list owners) when using equivalent electronic methods, the USPS reserves the right to require the Licensee revert to the traditional paper method of PAF completion. Any method used by a Licensee for verification under this new ruling applies ONLY to PAF collection under the NCOA^{Link} Full Service License Agreement. There is no implied or implicit application of this ruling to ANY relationship, practice or agreement between the USPS and the Licensee. The USPS offers a wide range of services to its customers, and separately sets the appropriate requirements for each of these services, including electronic processes.

- In section 9.1(FSP LPR) and 8.1 (LSP LPR) in the next to last sentence, removed the term 'hardcopy.'
