

## **Disclaimer**

The new Stage I file is processed with SHA 256 static data. Please report any discrepancies you find to the CASS Department via email to [cassman.ncsc@usps.gov](mailto:cassman.ncsc@usps.gov).

### **DPV Header**

The DPV header record is not included on the new Stage I file only because it was changing the fixed length records from 602 to wherever the record ended causing the file to be skewed. A copy of the header file is available in this link [Stage I DPV header record](#).

### **Missing Categories**

This file is missing the following categories.

22 – “EWS” no match  
56, 57, 58, 59 - Puerto Rico  
4G – Unique ZIP Codes  
AF – Street Name Spelling variation  
F2 – Dual address on separate line  
G2, G3 – Aliases  
I2, I3 – Small Town Default  
K2, K8 – Multiple Response  
S4, S5, S6 – Highrise Default or delivery Point Alternate  
Y6 – Invalid street name

### **New Categories**

This file contains new categories that we introduced in the suspended CASS Cycle O presentation. These categories can now be tested to enhance your software.

#### **PBSA and CMRA**

- OA – Input contains double secondary. One is valid and the other is a PMB
- OB – Input contains double “#”. One is valid sec the other is a PMB
- OC – Input contains a sec and “#”. One is valid sec the other is a PMB
- OD – “#” w valid or invalid sec designator for PBSA

#### **R777 and Single Trailing Alpha**

- 27 – Match to R777 – do not count as valid ZIP+4 on 3553
- 28 – Single Trailing Alpha – DPV w/o trailing alpha
- 29 – Single Trailing Alpha – not allowed to drop trailing alpha because of address pattern
