LICENSING ANNOUNCEMENT
NOVEMBER 22, 2017

NO-STAT TABLE INCREASE

Primary Audience: DPV® and DSF²® Licensees

As stated in the October 13, 2017 notice regarding the inclusion of the NDD (Non-Delivery Days) tables in the DPV and DSF[2] products, beginning with the November product, the table listed below increased in file size. The size was increased to lower the density levels, which will reduce the potential rate of false positive responses. In prior months' versions, there were some addresses that were not flagged as No-Stat. The inclusion of these records caused the number of records that are populated in the No-Stat table to increase by approximately 15%.

Filename	Previous Size (bytes)	New Size effective with the November release
dph.hsx	134,217,728	268,435,456

If you have any questions or need additional information, please contact the Licensing Department at 800-589-5766 or ncoalink@usps.gov.
