## COMPLETED: Business Intelligence Database System (BIDS) Release 50.1.0.2

Today (**Friday, March 27, 2020**), the United States Postal Service implemented the following software change:

- Business Intelligence Database System (BIDS) Release 50.1.0.2

Business Intelligence Database System (BIDS) Release 50.1.0.2 was a rolling release; and access to the Mailer Scorecard and other Mail Quality reports was not be impacted

Today's BIDS release enabled new eInduction Undocumented Container data to appear on the Mailer Scorecard detail reports. Previously, this data was missing when users drilled down on the Mailer Scorecard -- as eInduction Undocumented Container data was not available in the reporting tables from which it was being retrieved. Note that this update was a background change; therefore, it did not affect the layout of the Mailer Scorecard or drill reports. Please reference the Release Notes attached.

All Business Service Administrators (BSAs) should alert their impacted stakeholders.

Please direct any inquiries or concerns to the *PostalOne!* Help Desk via eMail ([postalone@usps.gov](mailto:postalone@usps.gov)) or telephone (1-800-522-9085).
