INDUSTRYALERT

ATTENTION: *PostalOne!*® Users

PostalOne!® Release 47.1.1.1

***PostalOne!*® Release 47.1.1.1** will deploy on Sunday, May 13, 2018 from 6:00 AM CT to 8:00 AM CT. This is a rolling release; hence, the *PostalOne!*® System will be available during this timeframe.

- There is no new Mail.dat client version with this release. Users should continue to use Mail.dat client version 47.1.0.0_PROD or version 47.1.1.0_PROD. The current Mail.dat Client may be downloaded from the Business Customer Gateway (BCG) using the following path: Mailing Services è Electronic Data Exchange [Go to Service] è Mail.dat download (Windows 32-bit, Windows 64-bit or Solaris).
- Mail.dat processing will be updated to properly account for the portion of a mixed-class bundle that is USPS Marketing Mail when calculating bundle charges. Currently, the bundle charge does not exclude the USPS Marketing Mail portion when the bundle charge is apportioned across the Periodicals statements. This causes the bundle charge to be greater than it should be.
- The Mail Entry Invoice Assessment creation process will be updated to properly account for adjustment data. Currently, the process does not receive the updated data due to an issue with the completion date being null (blank). As a result, mailers do not see confirmation that a payment has been made using their Enterprise Payment System (EPS) account, and can incorrectly click the payment option more than once.

Pre-Release Notes for ***PostalOne!*® 47.1.1.1** are posted on PostalPro at:
