

LICENSING ANNOUNCEMENT

JUNE 15, 2018

AMS API DLL's and Shared Objects

Primary Audience: AMS API Licensees

A change was made to AMS API version 3.03.07.N, which was included in the June 2018 product release, requiring all AMS API DLL's to reside in the same directory. The directory of the main DLL must be used to load all other DLL's. This information was not included in the release notes; however it will be included in future release notes.

Previously all DLL's were searched using the system path, except for the primary DLL's (zip4_w32.dll/libz4Inx.so/libz4Inx64.so). In some cases, this would not allow customers to load different versions of the DLL's and their associated DLL's for that month.

We apologize for the inconvenience this may have caused.
