TABLE OF CONTENTS

NOTE: *PostalOne!* System issues are identified by ALM Item ID and cross-referenced with ALM Requirement ID (*99999-R*) where available.

NOTE: The information in this document concerns planned revisions that are not historical facts. Actual results may differ from these forward-looking statements.

ALM INDEX

1.0 Introduction

On Monday, July 23, 2018, the United States Postal Service will implement the following software change:

- *PostalOne!* System Release 47.3.1.1

These Pre-Release Notes provide the contents of the release and affected subsystems.

The section titled **Corrections to Known Issues** is derived from External Trouble Reports (ETRs) and Engineering Change Requests (ECRs) for inclusion in this release.

This document is prepared based on the knowledge available at the time of its publication and any element may be subject to change prior to publication.

2.0 Mail.dat Client Support

Please note the following regarding the Mail.dat client download.

There is no new Mail.dat client version with this release. Users should continue to use Mail.dat client version 47.3.0.0_PROD. The current Mail.dat client may be downloaded from the Business Customer Gateway (BCG) using the following path: Mailing Services ➔ Electronic Data Exchange [Go to Service] ➔ Mail.dat download (Windows 32-bit, Windows 64-bit or Solaris).

3.0 *PostalOne!* System - Corrections to Known Issues

3.1 Electronic Data Exchange

For Mail.dat submissions that contain Bound Printed Matter (BPM) multi-piece parcels with correct rate ingredients, the total weight is incorrectly displayed as higher than it should be. Total postage is calculated correctly. However, the error in total weight calculation prevents finalization because the inflated total weight skews evaluation of the average weight validation and causes it to fail. This validation expects the average weight of the parcels in the mailing to be less than or equal to the maximum weight of BPM parcels. The logic will be revised to display the correct total weight for BPM multi-piece parcels submitted through Mail.dat. 12532 (19625-R)
