1.0 Introduction

On Sunday, February 10, 2019, the United States Postal Service will implement the following software change:

- *PostalOne!* System Release 48.0.2.0

These Pre-Release Notes provide the contents of the release and affected subsystems.

The section titled **Corrections to Known Issues** is derived from External Trouble Reports (ETRs) and Engineering Change Requests (ECRs) for inclusion in this release.

This document is prepared based on the knowledge available at the time of its publication and any element may be subject to change prior to publication.

2.0 Mail.dat Client Support

Please note the following regarding the Mail.dat client download.

There is no new Mail.dat client version with this release. Users should continue to use **Mail.dat client version 48.0.1.0_PROD or 48.0.0.0_PROD**. The current **Mail.dat client** may be downloaded from the Business Customer Gateway (BCG) using the following path: Mailing Services → Electronic Data Exchange [Go to Service] → Mail.dat download (Windows 32-bit, Windows 64-bit or Solaris).

3.0 *PostalOne!* System – Corrections to Known Issues

3.1 eInduction

For Mail.dat submissions with “CATLOG” (catalog) in the Component Characteristic Record (.ccr), eInduction logic will be updated to enable the Intelligent Mail® container barcode (IMcb) to be released to Surface Visibility (SV). Currently, for Mail.dat submissions that include catalogs in the .ccr, the eInduction logic does not recognize “CATLOG” as a valid processing category, which prevents the success message from generating to pass the container to SV. [12994 \(20303-R\)](#)

3.2 *PostalOne!* System Interface with Enterprise Payment System (EPS)

The *Postal One!* System interface with the Enterprise Payment System (EPS) will be updated to send Total Pieces to EPS for Return transactions involving an EPS account. For Returns, the Total Pieces are currently missing from the transaction details that the *PostalOne!* System sends to EPS. As a temporary workaround until the issue is resolved, users can access the transaction details for Returns using the Postal Wizard reports. [12992 \(20301-R\)](#)
