

Date Added to List	Detected on Date	Item ID	Application	Summary	Module	Priority	Target Release	Release Notes
2/11/2019	2/8/2019	13014	PostalOne!	elnduction: MDQ-IV not receiving Undocumented errors for non-continuous MIDs	Mail.dat & Mail.XML	02-Medium		Filtering for the Mail Quality Data (MQD) used by Informed Visibility (IV) will be updated to include non-continuous Mailer IDs (MIDs) in the MQD-IV feed. This will align the MQD-IV data feed to MicroStrategy reporting. Currently, Undocumented errors for non-continuous MIDs scanned by Intelligent Mail Visibility Service (IMVIS) are incorrectly filtered out of the MQD-IV data feed. As a result, mailers see Undocumented errors in their MicroStrategy reports which are not reflected in the MQD-IV data feed.
2/11/2019	2/1/2019	13000	PostalOne!	On the Fee Expiration Dates Report under Balances and Fees, the Fee Due Date and the Paid column are sometimes incorrectly showing the fee as due and unpaid.	Administrative Module	02-Medium		On the Permit Fees Detail Report under Balances and Fees, the Fee Due Date and the Paid column are sometimes incorrectly showing the fee as due and unpaid.
2/11/2019	1/23/2019	12971	PostalOne!	PO! not sending Mailing City and Mailing State for outbound transactions to EPS in a spot that EPS can currently use to populate in EPS reports and to pass on to IV MTR	BMEU	02-Medium	3/17/2019	The <i>PostalOne!</i> System will modify the way in which the Mailing City and Mailing State are sent to the Enterprise Payment System (EPS) for outbound transactions. This will enable the data to be included in the Commercial Mailing and Shipping Details report and will also be sent to the Informed Visibility - Mail Tracking and Reporting (IV-MTR) system for reporting.
1/31/2019	1/17/2019	12962	PostalOne!	Mixed Class Comail Jobs with Pre-Price Mailing Dates Incorrectly Throwing Arrival Date Errors During Finalization	Domestic Postage Processing	02-Medium		Postage statement processing for the <i>PostalOne!</i> System will be updated to correct an error preventing finalization of mixed-class co-mail statements with mailing dates prior to the price-change effective date. Statements of this type are incorrectly evaluated as post-price change statements, resulting in an Arrival Date error during finalization. The error is: "Mail Arrival Date must be between 1/27/2019 and 1/31/2019".
1/31/2019	1/8/2019	1311	eBilling	ETR 1311 - Permit records in EPS with Delete status prevent EPS account closure	Manage Payment Account	01-Low		An issue will be corrected that currently prevents an EPS account from being closed due to the Delete status of the linked permit.
1/31/2019	1/7/2019	1309	eBilling	ETR 1309 - Performance issue with EPS portal dashboard page not loading	Manage Payment Account	02-Medium		Performance will be improved for loading the Dashboard page on the EPS portal.
1/7/2019	1/4/2019	12912	PostalOne!	StartTheClockDelivery split issue with message greater than 500KB in PushDD	Mail.XML WS	03-High	3/17/2019	Mail.XML Data Distribution will be updated to properly handle large StartTheClockDelivery messages greater than 500KB. For files of this size, the message is split into multiple parts for Mail.XML Push Data Distribution. However, currently several data elements are missing or incorrect in the resulting split XML files. The DropShipYesNo value is being incorrectly changed from "Y" to "N" in the split files, and the ContainerID, ContainerType, and Intelligent Mail (IM) barcode (IMcb/IMpb/IMtb) are missing from the XML split files.
1/7/2019	1/4/2019	12909	PostalOne!	PO! not sending piece rate and pound rate to EPS for Commercial ePacket (3700P)	BMEU	01-Low		For Commercial ePacket statements using an Enterprise Payment System (EPS) permit, the piece rate and pound rate will be displayed in the EPS Line Details Report at the account level. Currently, EPS is not receiving this information from the <i>PostalOne!</i> System for Commercial ePacket transactions using an EPS permit.
1/7/2019	1/2/2019	1301	eBilling	ETR 1301 - EPS Accounts with suspended ACH Debits are getting skipped for deactivation due to returns	Manage Payment Methods	02-Medium		EPS will be updated to correct an issue that causes EPS Accounts with suspended ACH Debits to be bypassed for deactivation due to the presence of one or more returns.
1/7/2019	1/2/2019	12903	PostalOne!	Mail.dat - Error 3955 throwing for transportation update jobs when consolidator has not been submitted	Mail.dat & Mail.XML	01-Low	3/17/2019	Mail.dat validation will be updated to reinstate error 3955 and prevent it from being incorrectly generated for transportation update submissions when a consolidator has not been submitted. Mail.dat error code 3955 is currently being generated incorrectly for transportation update submissions that have no consolidator job. The error has been temporarily set to a warning until the issue is resolved. Error code 3955 is: "The .csm Container Status field value provided was {1}; it cannot contain T = Transportation Information Update, if after R = Ready To Pay or X = Previously Closed or Paid, after the co-palletization consolidator job has been submitted."
12/31/2018	12/21/2018	12880	PostalOne!	EPS regression - When MT permit is linked to trust primary EPS account opening and estimated closing balances are not displayed in PW summary and ecan pages.	Postage Statement Wizard	02-Medium	3/17/2019	The Postal Wizard Summary will be updated to consistently reflect the correct opening balance and estimated closing balance for Enterprise Payment System (EPS) accounts. Currently, when an EPS account is linked to a Metered (MT) permit as the primary payment method for the EPS trust, the Postal Wizard Summary and Electronic Confirmation Acceptance Notice (eCAN) pages do not display the correct opening and estimated closing balances for the account.
2/11/2019	12/17/2018	12865	PostalOne!	MDAT - Validation throwing incorrectly in Non-Incidental Enclosure	Mail.dat & Mail.XML	01-Low	6/9/2019	Mail.dat validation will be updated to properly account for eDoc submissions that include non-incidentals enclosures with a different rate type than that of the host component. Currently, Mail.dat validation incorrectly generates error 4871 in this scenario. As a workaround until the issue is resolved, error code 4871 has been temporarily changed to a warning message. Mail.dat validation code 4871 will be reinstated to error status upon resolution of the issue. Mail.dat validation 4871 is: "The .mpu Mail Piece Unit - Rate Type must be populated with the same value as the host .cpt Component - Rate Type."
12/31/2018	12/12/2018	12850	PostalOne!	PW - BPM Fees Warning Displaying incorrectly for Non-Presorted Mail Pieces	Postage Statement Wizard	01-Low	3/17/2019	The Postal Wizard will be updated to eliminate the display of an incorrect fee warning message for Bound Printed Matter (BPM) postage statements. Currently, during entry of non-presorted BPM postage statements in Postal Wizard, a warning is incorrectly displayed notifying the user that the BPM fees are not up-to-date. Presort/Destination Entry Fees are not applicable to Non-Presorted/Non-Destination Entry mail.

Date Added to List	Detected on Date	Item ID	Application	Summary	Module	Priority	Target Release	Release Notes
1/7/2019	12/4/2018	1263	eBilling	ETR 1263 - Multiple trust deposits/transactions for one account that are very close together can return 500 error	Process Transactions	02-Medium	3/17/2019	EPS transaction processing logic will be updated to properly handle multiple trust transactions that occur at nearly the same time. Currently, this scenario can sometimes incorrectly return a failed status ("500: Internal Server Error"), even though the transaction was actually processed successfully. As a result, downstream systems see an incorrect status, which looks as if the later transaction failed when it did not.
2/11/2019	11/29/2018	12823	PostalOne!	ETR - Correct POSASP XSD validation failure	Interface	02-Medium		The new version of Mail.XML has caused an issue with POSASP data loads in Production. POSASP XSDs need to be updated to include V & X enumeration values in the addressType and generate new xmlbeans java classes based on the updated XSDs. The updated XSDs accommodate the V and X enumeration values and resolve the present issue with the PO-SASP data loads.
12/31/2018	11/29/2018	12825	PostalOne!	Mail.dat Firm Bundles with One or More ComboPacks	Mail.dat & Mail.XML	02-Medium		With this change the <i>PostalOne!</i> System Mail.dat application will allow for Periodicals mailings to have Firm-Bundles that contain Polybags/ComboPacks. This change will allow for piece charges to be calculated correctly to one piece per Firm-Bundle as compared to one piece per ComboPack. This change does not change the logic of ComboPacks in other Non-Firm Bundles (an existing feature).
2/11/2019	11/1/2018	12759	PostalOne!	Mailer Fee Calendar does not display EPS account numbers	Mailer View Functionality	02-Medium		The Mailer Fee Calendar will be updated to include the Enterprise Payment System (EPS) account number for permits linked to an EPS account. The Mailer Fee Calendar is accessed from the Balance and Fees page and displays a list of permits along with their associated account numbers.
1/7/2019	11/9/2018	1234	eBilling	ETR 1234 - EPS is not sending a customer update file for closed accounts	Manage Payment Account	02-Medium	3/17/2019	EPS will be updated to consistently identify and send a customer update file to Oracle Accounts Receivable (A/R) for closed accounts. A defect introduced in a previous release erroneously prevents inactive customer accounts from being sent to Oracle A/R. This causes Oracle A/R to continuously retry deposits submitted against the closed accounts, and the funds that are part of the deposit require a manual cancellation of the submission in order to remedy.
1/7/2019	11/2/2018	12763	PostalOne!	IM Container Barcode being inserted for non fully finalized containers	Mail.dat & Mail.XML	02-Medium	3/17/2019	Mail.dat validation will be updated to properly handle deletions for Intelligent Mail container barcodes (IMcbs) on consolidator submissions. Currently, when a Mail.dat deletion job is submitted for a tray-based consolidator, the pallet IMcbs are not being deleted from the <i>PostalOne!</i> System. As a result, valid barcodes can then incorrectly fail eDoc submission with error code 7106. Error code 7106 is: "For Seamless, the .csm Label: IM Container Or IM Tray Barcode field must be unique within the submitted job and amongst all physical pallets associated to the .seg eDoc Sender CRID value that were finalized within the last 45 days of the Postage Statement Mailing Date."
1/7/2019	11/2/2018	12762	PostalOne!	Mail.dat Client encounters Validator level system error on potentially seamless submission when postage statement mailing date is not populated	Mail.dat & Mail.XML	02-Medium	3/17/2019	Mail.dat client validation will be updated to prevent a system error from occurring on potential seamless submissions. Currently, when the mailer constructs a Mail.dat job submission with a Customer Registration ID (CRID) enrolled as seamless (either currently or previously), if the .csm Postage Statement Mailing Date is not populated on the container(s), the job fails validation with a system error. For example, this may occur in the scenario where a mailer may submit a Mail.dat job with a blank .csm Container Status if they intend only to generate a Qualification Report. The validation logic will be updated to bypass the .csm Postage Statement Mailing Date when it is not populated. This issue does not impact postage.
12/31/2018	10/31/2018	12754	PostalOne!	Dashboard – Unable to View Postage Register for Large Mailings	Domestic Postage Processing	01-Low		The <i>PostalOne!</i> System Dashboard will be updated to properly display the Postage Statement Register for large mailings. Currently, an error appears when users attempt to access the Postage Statement Register for a large mailing. The message "Page Cannot Be Displayed" or "Error in Pagination" displays.
2/11/2019	10/12/2018	12695	PostalOne!	Mail.dat - Rounding for Metered Correct Statements resulting in .01 Postage Due	Mail.dat & Mail.XML	01-Low		Mail.dat postage statement processing will be updated to correct a rounding issue for Metered Correct postage statements that can incorrectly result in \$.01 postage due for Metered Correct mailings submitted by Mail.dat. Currently, Mail.dat rounds the USPS Total Adjusted Postage to two decimal places, but the Affixed Postage remains rounded to 3 decimal places.
2/11/2019	9/20/2018	12653	PostalOne!	Mail.dat – Correct Parcel Select Lightweight Service Type Code Validations	Mail.dat & Mail.XML	01-Low	3/17/2019	Mail.dat and Mail.XML validation will be updated to correct the evaluation logic for Parcel Select Lightweight Service Type Code. Currently, for electronic Parcel Select Lightweight submissions containing valid Service Type Codes, warning code 4539 (Mail.dat) or 9571 (Mail.XML) is incorrectly generated. The applicable warning codes (shown below) are unchanged. Mail.dat validation warning 4539: "For {1}, the STC portion of the IMpb provided in the .pdr IM Barcode field must match the .mpu Mail Piece Unit - Class. The value provided was {2}" Mail.XML validation warning 9571: "The STC portion of the IMPackageBarcode populated in the ServiceTypeCode field of the IMPackageBarcode block in the MailPieceCreateRequest or MailPieceUpdateRequest must match the FormType provided in the QualificationReportSummaryCreateRequest message."

Date Added to List	Detected on Date	Item ID	Application	Summary	Module	Priority	Target Release	Release Notes
1/16/2019	9/12/2018	1167	eBilling	Mailing Details Report shows twice the Piece Count	PostalOne! Reports			The Mailing Details Report will be updated to accurately reflect the piece count. Currently, a defect causes the piece count to be doubled for some transactions.
1/16/2019	8/29/2018	12618	PostalOne!	The mail.dat client failed to upload job due to exceed the allowable size limit of pdr file		02-Medium		The Mail.dat client fails to upload jobs that exceed the allowable size limit for Piece Detail Record (PDR) files. The current size limit for PDR files is 2,147,483,647 bytes. As a temporary workaround, users can split the PDR file or use a Piece Barcode (PBC) file instead.
1/16/2019	8/28/2018	12614	PostalOne!	Inc 3495594 - CAPS Transaction History Report missing Adjustment Transactions	Interface	02-Medium		The CAPS Transaction History Report will be updated to correct a defect in data retrieval that prevents the report from displaying Adjustment Transactions.
8/29/2018	8/1/2018	12573	PostalOne!	PostalOne Mail Owner Report and Customer Mail Report Total Postage do not match	Reports	01-Low		For Mail.dat submissions, <i>PostalOne!</i> System Report processing will be updated to correct a display issue. The total postage reflected for a customer on the Mail Owner Report does not match the postage for the customer in the Customer Mail Report.
8/22/2018	7/3/2018	12513	PostalOne!	Incorrect Mailing Volume Information on Mail Owner/Preparer Scorecard	Reports	02-Medium		The Mailer Scorecard will be updated to consistently reflect accurate mailing volume information. Currently, a defect in summarization of the mailing data from the <i>PostalOne!</i> System is resulting in incorrect volume counts for some mailers on the Mailer Scorecard. The impacted volume counts are reported on the Mailer Scorecard as lower than the actual volume.
7/3/2018	7/3/2018	12511	PostalOne!	EPS Account Balance Displayed Incorrectly on Confirmation Page	Domestic Postage Processing	01-Low		A display issue will be corrected on the Confirmation page to enable the Enterprise Payment System (EPS) Account Balance and Estimated Ending Balance to display accurately. Currently, incorrect balance amounts are displayed on the Confirmation page due to a logic defect in retrieval of these balances. This is a display issue only.
2/11/2019	6/11/2018	12474	PostalOne!	Regression Automation -- Standard Mail non-identical statement -- difference in total weight in Presort verification in BMEU and Mailer	Domestic Postage Processing	02-Medium	3/17/2019	An issue will be corrected to use consistent rounding methodology for USPS Marketing Mail non-identical postage statements between the Business Mail Entry Unit (BMEU) and the Postal Wizard. Currently, there is a difference in the Total Weight calculation for Presort verification between BMEU and Postal Wizard entered statements. Within the BMEU, the unit weight for Presort verification is not rounded up; however the Postal Wizard rounds the unit weight. The difference in the Total Weight for Presort verifications can sometimes result in different amounts for the Mail Piece Weight in Ounces, which is used for calculation of the Additional postage.
1/16/2019	5/25/2018	1042	eBilling	ETR 1042 - Incorrect handling of ACH Debit Returns within EPS impacts customer trust balance	Process Transactions	03-High	3/17/2019	EPS will be updated to properly handle ACH Debit Return transactions to ensure an accurate trust balance.
1/31/2019	2/22/2018	924	eBilling	EPS User's Session Ended Despite Activity	Standard Report Functionality	03-High		EPS will be updated to prevent user sessions from timing out incorrectly due to perceived inactivity.
12/12/2017	11/14/2017	11718	PostalOne!	Fees for Parcel Select, Media Mail and Library Mail should be \$0 (since R45 at least). PO! shows \$225 per class.	BMEU	03-High		The <i>PostalOne!</i> System will be updated to properly handle annual mailing fees for Parcel Select Mail (destination entry or Lightweight), Presorted Media Mail, and Presorted Library Mail. There is no annual fee for mail in those classes. The Fee Payment Confirmation page incorrectly shows a fee of \$225 for transactions in those mail classes, but should display \$0 instead.
8/1/2017	7/12/2017	11233	PostalOne!	Fee waiver status display on Balance and Fees update required	BMEU	02-Medium		The Balance and Fees page will be updated to correct the display of fee and fee waiver status information. This is a display issue only.
3/8/2017	3/6/2017	10766	PostalOne!	Issue Level Postage Statement - Report not displaying for some permit accounts - possibly a browser issue	Reports	02-Medium		An issue will be corrected to ensure the Periodicals Issue Level Postage Statement can be consistently displayed. Currently, the Periodicals Issue Level Postage Statement is not displaying for some permit accounts.
1/23/2017	1/22/2017	10593	PostalOne!	PDF download of PS Form 3600 First Clas Mail postage statement displays Part A Total rounded incorrectly	BMEU	01-Low		The downloadable PDF format of First-Class Mail postage statements will be updated to display the "Part A Total" using 2 decimal places for consistency with the online postage statement, as specified in DMM 604 section 7.1.2, Expression of Numerical Values. This is a display issue only on the downloadable PDF for First-Class Mail postage statements, and does not affect the postage charged on the statements.
10/13/2016	10/11/2016	10149	PostalOne!	Mail Owner Report does not show name of mail owner for single mail owner statements as part of a combined mail	Reports	02-Medium		For postage statements which are part of a combined mailing and which have only one mail owner, the Mail Owner name is blank on the Mail Owner Report accessed from the <i>PostalOne!</i> System Dashboard.
5/9/2016	4/21/2016	9480	PostalOne!	SN - INC000001324732 - Update Non Profit System to allow email address ending in other than .edu, .com., .org	NonProfit	02-Medium		The Non Profit Application Authorization System will be updated to recognize email addresses with more than 3 characters in the top-level domain name. This will allow the system to accept email addresses with extensions other than .com, .net, .gov., .org, etc. (e.g., xyz@testuser.info).
2/2/2016	2/1/2016	8964	PostalOne!	In MERLIN the Presort postage is incorrectly subtracted from USPS Total Adjusted Postage.	Domestic Postage Processing	02-Medium		MERLIN Presort Postage is incorrectly being subtracted from USPS Total Adjusted Postage. Lower than expected postage amounts are displayed when a job is processed by MERLIN and manually finalized.
