

eVS[®] Electronic Verification System Pre-certified

Current as of April 5, 2019.

Software Certified for mailers to use eVS for parcel shipping:

- Pre-certified for File format
- Pre-certified for labels

With eVS you get:

- The best commercial prices with the largest discount available
- Piece-level tracking information at no additional charge for most products
- Access to new products, services, and enhanced features
- Flexibility in the production environment as no manual postal verification is needed for acceptance
- Single national permit

eVS Supports:

All parcels entered through commercial channels:

- Priority Mail Express[™]
- Priority Mail[®]
- First-Class Package Services[®]
- Parcel Select[®]
- Parcel Select Lightweight[®]
- Bound Printed Matter
- Marketing Parcels
- Media Mail
- Library Mail
- Priority and Priority Express Open and Distribute
- First-Class Parcel International
- Priority Mail International
- Priority Mail Express International

Using a certified software version enables the mailer to meet the new IMpb and data submission requirements:

1. **Electronically submit a Shipping Services File with manifest, tracking, and postage information in one file (through the Electronic Verification System - eVS[®])**
 - Submission is one file which includes the Shipping Services File (with destination delivery address or ZIP+4 and Destination Delivery Point Code information) and postage information
 - Payment for postage is deducted from a centralized electronic postage payment account (a Centralized Account Processing System – CAPS account)

Certified Software will meet the IMpb compliance requirements:

You have several tools to help you meet the IMpb and data submission requirements:

1. Become an eVS mailer (visit <https://postalpro.usps.com/shipping/evs>)
2. Use a certified vendor software solution (listed on the following page)

Pre-certified Software for eVS:

All commercial packages are required to submit their mailing information electronically using a file referred to as a Shipping Services File. The Shipping Services File must be version 1.6 or higher, be submitted prior to presenting a shipment, and it is required that any mailer who ships to APO/FPO or International use either version 1.7 or 2.0. Not all certified software versions support all mail classes and shipping options, please use reference on the following page to select solutions that will meet your future shipping needs

For help signing up for eVS or more information, contact the eVS Help Desk at evs@usps.gov or 877-264-9693 option 2

For additional information on the [Shipping services File](#) view Publication 199, accessible online via <https://postalpro.usps.com/node/104>

Certified eVS Software Versions:

To help you ship eVS and meet the requirements to generate a Shipping Services File and an IMpb, the following vendors have successfully tested their software versions with the Postal Service. These software versions offer the shipper the ability to use eVS without going through the traditional certification process. Please contact the vendor below for specific information about software capabilities and features.

NOTE: Only the Software version indicated for vendors listed below is certified for eVS precertification approval.
