Business Customer Gateway (BCG)

Business Customer Gateway (BCG)

Overview

The **Business Customer Gateway (BCG)** is the web portal designed for USPS Commercial Mailing & Shipping users. We are **redesigning the BCG** to develop a **world class** online experience for our customers

Customers can **Manage User Roles & Access to 40+ Services** through the BCG

Business Customer Gateway (BCG) – Revoke and Archive User Access

Business Customer Gateway (BCG)

BSA/Delegates will have the ability to revoke and archive Users under the “Manage Users” tab by clicking “Revoke and Archive Access”.

Manage Users

[Manage Profile](#)[Manage Favorites](#)[Manage Services](#)[Manage Locations](#)[Manage Users](#)

Manage Account >> Manage Users

Control access to your BSA services.

Business Customer Gateway (BCG)

Phase 1

- New BCG User Interface & Style
- Streamlined Navigation To Services
- BCG Widgets
 - Enterprise Payment System
 - Mailer Scorecard
 - Recent Mailings (*PostalOne!* Dashboard)
- Account Management Enhancements

Phase 2 (Planned)

- Additional BCG Widgets
 - Informed Delivery
 - Informed Visibility
 - Package Platform Scorecard
- Address Verification for CRID Creation
- Implementation of Task Team & Pilot Group Feedback

The pilot phase will give customers the opportunity to test and provide feedback on the new BCG

Pilot Link

- A separate prototype link will be provided to testers
 - Pilot testers will still be able to access the old BCG
 - Pilot group availability is limited
-

Pilot Launches
2020

Seamless Acceptance

Federal Register Notice – Proposed

- *Anticipated posting by September 2019, 30 day comment period
- Seamless mandate for DMU's and 90% Full-Service BMEU entered
- Seamless Parallel by March 1, 2020
- Seamless by February 1, 2021
- Retirement of manual verifications for mailers submitting over 90% Full Service volume July 1, 2021
- Auto-finalization of Seamless postage statements even if permit fees are due for renewal

*Pending outcomes of discussions

Seamless Sampling Approach

- Remove general PAF (Weight, Payment, Mail Characteristics (Processing Category/Non-Profit))
- Perform Sampling current state (1,3,30)
 - Implement Downstream Sampling
 - Potentially adjust error logging threshold to account for downstream sampling
 - Evaluate Frequency of Downstream Sampling
- Compare Sample Weight, Payment, Mail Characteristics to eDoc Job/Version/Segment
- If error logged for Weight, Payment, Mail Characteristics assess across job/version/segment volume
- Establish Error Threshold for Weight, Payment, Mail Characteristics
- Proposal would to initially look at Periodical mailing (Future state would be across all categories or classes)

USPS Next Steps

- Conduct test on July data to compare PAF to the above approach
- Continue evaluation of Certification process

Permit Balance Validation for MSPS

1. Within PostalOne! (PO1!), the balance check screen would display for MSPs only. Check BCG to see if they are flagged as an MSP
2. If flagged as an MSP, user would enter Permit, Permit Type, Permit City, Permit State, Finance Number (Optional), and amount of postage
3. PO! checks the postage amount against the permit balance in either Local Trust, CAPS, or EPS to determine if there is enough funding to cover the postage
 - a. PO! would only look at postage amount provided, and will not consider any other UPD postage statements for the comparison
4. The screen would provide back if there is enough funds or not enough funds to cover the postage
 - a. Display a disclaimer that the balance is only a point in time and didn't consider any other UPD postage statements for the comparison

- ✓ Change Request submitted and approved for Jan 2020 Price Change
- ✓ “CAPS Transaction Number” field to read “CAPS/EPS Transaction Number” and will display the EPS transaction number when linked to EPS account

Sampling & PAF

Current Sampling Approach

IMD

- Sample 70 weekly packages per mailer per site
- Mailer must exceed 250 package threshold at a site to be sampled

ODIS

- Statistically random sampling approach
- Primary sampler at DDU's

Retail

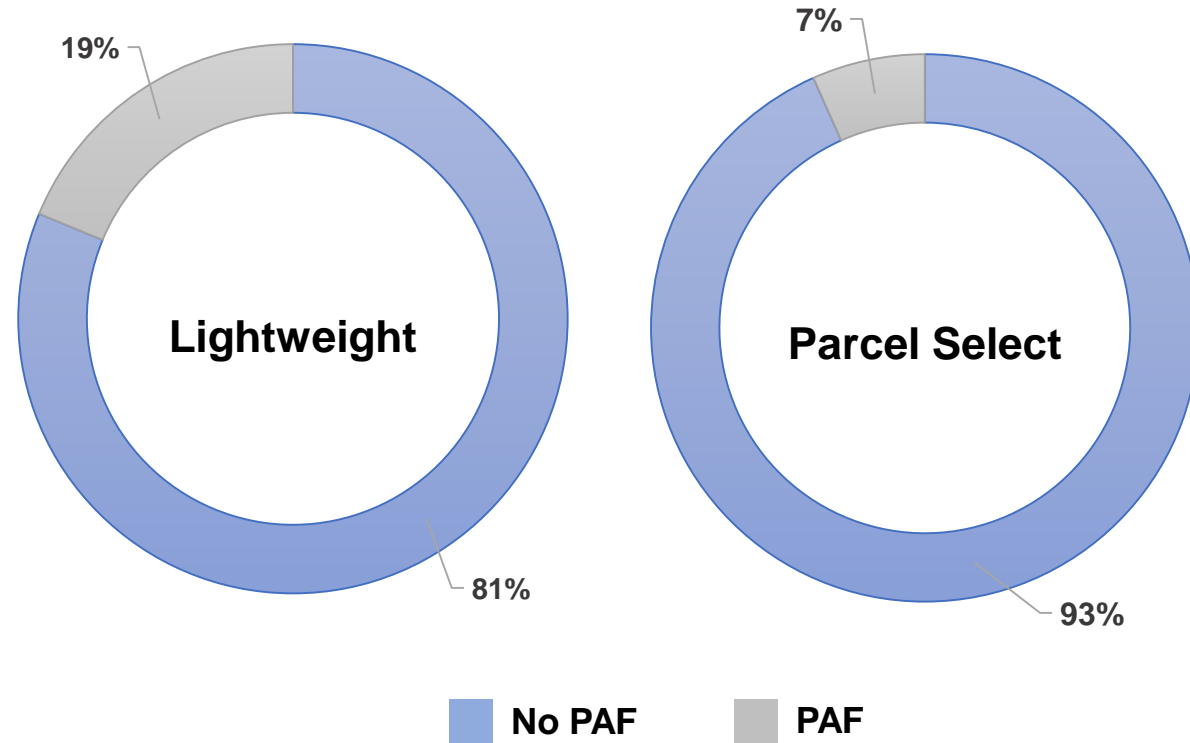

- Performed when proof of shipment is requested

Current PAF

- PAF is weighted by entry-facility (post-stratification)
- PAF Threshold: 1.5%

Mailers with DDU Entered Volume

PPC Sampling Approach

Upgraded PASS Machines

- Conducted only at DDU
- Packages are randomly selected
- Sample weight and dimensions are captured by PASS scales and dimensioner

Clerk Sampled

- Can select packages to verify manifested attributes
- Postage discrepancies not included in PAF
- Assessed as shortpaid

PPC PAF

- PAF applies to DDU volume
- Post stratification is unnecessary
- PPC PAF Threshold: 1%
- All PAFs Exceed Current 1.5% Threshold

Mailers with DDU Entered Volume

PPC Sampling Approach

Upgraded PASS Machines

- Conducted only at DDU
- Packages are randomly selected
- Sample weight and dimensions are captured by PASS scales and dimensioner

Clerk Sampled

- Can select packages to verify manifested attributes
- Postage discrepancies not included in PAF
- Assessed as shortpaid

eVS July PAF

eVS Mailer Summary

| | April | May | June | July |
|--------------------------------|-------|------|------|-------------|
| % of Mailers with PAF | 8.4% | 6.8% | 7.4% | 10.4% |
| Adjusted % of Mailers with PAF | | | | 8.9% |
| Impact of DIM on PAF | | | | 1.5% |

- June implementation of DIM led to a total increase in Shippers with PAF of 1.5%
- When removing Shippers not manifesting DIM, the observations were within trend

DIM Weight Sampling

Sampling for DIM Weight

Entering Dimensions on IMD Handheld

When Dimensions are Captured

Use Measurements on Packaging

When Dimensions are Captured

If any side of the package (length, width, height) is equal or greater than 12 inches

Dimensions will be captured in sampling

Using Provided Dimensions on Packaging

Samplers are being directed to apply dimensions marked on packaging

The placement of provided dimensions markings vary

If package marking noticeably appears to be different from what the actual dimensions may be, samplers will not use provided dimensions

Unmanifested Reporting

Unmanifested Reporting

Keyed vs Scanned

- Mailers are not being charged if check digit is incorrect.
- This is currently being displayed in the unmanifested report.

Manually Unmanifested Records Report

[Manifest Mailing](#) [Reports](#)

UNMANIFESTED RECORDS REPORT
 DROPPED UNMANIFESTED RECORDS REPORT
 PREVIOUSLY MANIFESTED RECORDS
 MANUALLY ENTERED UNMANIFESTED RECORDS

Parcel records listed in this report come from Product Tracking System (PTS) data provided by the scanning of parcel barcodes on parcels received and handled by the Postal Service; and from eVS sampling data provided by the scanning of parcel barcodes on parcels sampled for postage payment verification. The Package Identification Code (PIC) in each parcel barcode could not be matched with a PIC in any eVS manifest file records transmitted by the mailer. As a result, parcels represented by these records are considered manually unmanifested and require the collection of postage based on an averaged per unit cost. The client/site number and client/site name displayed are derived from the Mailer ID in the PIC and are registered under the mailer's profiles in both PTS and eVS.

Total Records: 4

[First/Prev] 1 [Next/Last]

Soft-Packaging

Industry Goals/Objectives

Potential Outcomes

- ✓ Reduce risk of soft-packaging pieces subject to DIM Weight pricing through non-rectangular DIM pricing
- ✓ Ensuring methods of measurement are clearly defined for applicable pricing

- ✓ Reduce risk of DIM-weight pricing by introducing a soft-packaging rate indicator in SSF

2020 Price Change

Saturation PlusOne Market Test For Saturation Letter Mail

USPS is considering a new “Saturation PlusOne” market test to allow automation Saturation Letter Marriage Mail to include a postcard (Saturation PlusOne) to the mailing at a new, separate price

- The host letter and the PlusOne card would be addressed (automation), including IMb Barcodes, and all “Saturation PlusOne” pieces will be associated to DSCF entered Saturation, or High Density, or High Density Plus host pieces
- Prices for the market test will be based on four regions created for this market test and DSCF ZIP Codes will be mapped to their respective regions to determine specific entry pricing. Prices for the DSCF ZIP Codes based on the four regions will be made available to participants

○ Postage Statement Changes

Electronic version PS Form 3602 N & R (accessible via Business Customer gateway) – Extra Service line S36 will be populated for mailings with Plus-One pieces (mailer must have authorization to participate). Postage Statement must have piece volume for DSCF entered Saturation, High Density, High Density Plus letters (current statement lines C9, C10 and C11), that is higher than or equal to the volume of Saturation PlusOne volume

○ Mail.dat Changes

Use existing .sfr Value of ‘A’. In addition the description for .sfr Piece ID will be updated to include reference to PDR

○ Mail.XML Changes

Use existing ServiceCode of ‘AA’ – Recommendation: Create a separate statement for each DSCF Entry ZIP Code

○ Shipping Services File (SSF) Changes

No impact

○ Indicum Creation Record (ICR) File

No impact

○ Price Change Type / Product Type

Market Dominant

Separation of Traditional and Marketing Detached Address Labels (DALs)

The USPS is considering creating separate pricing for marketing and traditional DALs

- This will align with the ability to differentiate between a Detached Address Label (DAL) and a Detached Marketing Label (DML) already on the postage statement, and with pricing of the two differently as they serve different purposes.
- Expanding the definitions of what can be included on either type of detached address label (DAL or DML) is also being considered.

○ Postage Statement Changes

No impact – lines are already separate on postage statements

○ Mail.dat Changes

No impact – field already exists SEG-1136

○ Mail.XML Changes

No impact – field already exists PostageStatementCreateRequest > DMLType

○ Shipping Services File (SSF) Changes

No impact

○ Indicium Creation Record (ICR) File

No impact

○ Price Change Type / Product Type

Market Dominant

Permit Simplification

The USPS is considering simplifying and centralizing permits in order to better serve customers and to utilize current and new technologies that have eliminated prior operations costs for permit creation, payment, and maintenance.

- Annual presort fees would be eliminated for any permit used in a Seamless Mailing.
- For any mailing that is submitted by a Seamless mailer, all permits associated with that mailing will not be checked, regardless of who they belong to, thereby waiving the fee.
- The Permit Imprint application fee would be still applicable.

○ Postage Statement Changes

○ Price Change Type / Product Type

Market Dominant

Fee for electronic Verification Systems (eVS) Un-manifested Pieces

The USPS is considering an “un-manifested eVS fee” designed to encourage manifesting of all packages.

- This will apply to both eVS and Package Platform packages. Customers will only be charged for IMpb or un-manifested fees, but not both.
- Thresholds (to be established) will have to be met or exceeded before the mailer is charged.

○ Postage Statement Changes

No impact

○ Mail.dat Changes

Competitive

Automated USPS Returns

The USPS is considering mandating the retirement of MRS and USPS Returns SBP, which is replaced by the current automated USPS Returns platform and the EPS

- The USPS Returns service new methodology was deployed January 27, 2019 and leverages data captured on upgraded mail processing equipment to include package attributes to enable postage assessment of each return and enable account holders to pay the postage for their returns electronically.
- USPS has been working closely with returns customers for an extended period of years, and more actively prior to and since the deployment of the automated functionality, and believes MRS customers can convert by Summer 2020.

Competitive & Market Dominant

2020 Mailing Promotions

The USPS is considering the following enhancements associated to existing promotion features and platform:

- Functionality will be added to Business Customer Gateway (BCG) that would allow mailers to upload a .pdf sample of the mailpiece and link it to a postage statement qualifying for a given promotion.
- Consideration is being made to removing unused messaging functionality in Business Customer Gateway Incentive module, instead the respective contact information for email to the USPS Program Office will be made available for mailers to contact the USPS Program Office.
- A Promotions Calendar for Calendar Year (CY) 2020 is under development.
- Related to Earned Value promotion a third volume tier for a separate credit amount is under consideration for BRM, CRM and Share Mail volumes.

○ Postage Statement Changes

No impact

○ Mail.dat Changes

.ccr file will be updated to include a new field that represents the .pdf transaction ID associated with the incentive

○ Mail.XML Changes

The postage statement messages will be updated to include the .pdf transaction ID associated with the incentive. The new field will be added in associated with the DocumentVersionData field. Messages impacted are: PostageStatementCreateRequest, PeriodicalStatementCreateRequest, ConsolidatedPeriodicalStatementCreateRequest

○ Shipping Services File (SSF) Changes

No impact

○ Indicum Creation Record (ICR) File

No impact

○ Price Change Type / Product Type

Competitive & Market Dominant

Full-Service Fee Waiver Calculation Change

USPS proposes to change the Full-Service (FS) fee waiver calculation of annual presort fees. The change would waive annual mailing fees for those customers who give USPS more than 90% Full-Service eligible volume instead of those providing presort eligible volume.

- Current calculation: $\text{Cumulative FS\%} = \text{Number of FS Pieces} / \text{Total Number of Eligible Presorted Pieces}$
- Future calculation: $\text{Cumulative FS\%} = \text{Number of FS Pieces} / \text{Total Number of Eligible FS Pieces}$

Market Dominant/Business Mailing Fees

Dimensional for USPS Retail Ground

The USPS proposes to subject USPS Retail Ground to dimensional weighting. A configurable dimensional divisor, similar to Parcel Select, will be implemented for packages over one cubic foot (1,728 inches).

- The update will be implemented for all Zones 1 – 9 by dividing the cubic volume a configurable divisor, initially set to 166, unless any change is approved for January 2020. In addition, Balloon pricing will be removed and Oversized pricing (and structure) will remain.

Note: USPS Retail Ground Limited Overland Routes (LOR) will not adopt the DIM structure and the current Balloon and Oversize structure, and pricing, will remain unchanged.

- **Postage Statement Changes**

Retail

Overweight Fees

- DMM states in section 601.1.2 Overweight Items
 - [1-27-19] The maximum Postal Service mailpiece weight limit is 70 pounds, lower weight limits may apply. Any Priority Mail Express, Priority Mail, USPS Retail Ground, Media Mail, Library Mail, Parcel Select, and Parcel Return Service, item exceeding the 70 pound Postal Service maximum weight limit is nonmailable and if found in the postal network will be secured at the facility identifying the ineligible item for pick-up by the mailer or addressee. The Overweight fee will be assessed and must be paid by any **authorized retail payment method or through the Enterprise Payment System**, before release of the item.
- USPS can charge the fee through eVS via ad hoc adjustment.
- eVS will create training and work with the field to make sure addressees are not being charged.

BSA or Mailer logins to Business Customer Gateway

The screenshot shows the USPS Business Customer Gateway interface. At the top left is the USPS logo and the text "UNITED STATES POSTAL SERVICE®". The main header reads "Business Customer Gateway". On the left is a vertical navigation menu with the following items: Welcome, Inbox, Mailing Services, Shipping Services, Other Services, Support, and Manage Account. The main content area is titled "Welcome, Maggie" and features a large blue banner for "The New Enterprise Payment System Is Live!". The banner includes the text: "Pay for your commercial products and services through a single account! All eligible CAPS customers must migrate by April 1st. Access to EPS is granted via an invitation code. Request a code today by contacting your local BMEU or the PostalOne! Helpdesk at (800) 522-9085." Below the banner is a "Learn More >" link. To the right of the banner is a "Favorite Services" panel with buttons for: BALANCE & FEES, DASHBOARD, MAILER ID, MAILING REPORTS, MANAGE PERMITS, and POSTAL WIZARD, along with an "EDIT FAVORITES" button. Below the banner is a paragraph: "The Business Customer Gateway is your central hub for managing your USPS activity for your Business. Within this site, you will find Business Service tools that you will need to monitor, track, and manage your mailing and shipping activities. You can access these Business Services using the tabs on the left. When you know which services are useful to your business, you can add them as your favorite services using the panel on your right." Below this is a "Notifications and Alerts" section with a warning icon and the text: "Safeguard Your Account - Consider changing your password between 30 and 90 days. Click [Here](#) to change your password." At the bottom is a "Messages" section with an envelope icon and the text: "If you are a Mail Service Provider at any of your locations, you can now indicate yourself as such from the [Manage Locations](#) tab by clicking the Edit button." On the right side of the dashboard, there is a "Get Started with the NEW Business Customer Gateway" banner with a "LEARN MORE" button, featuring an image of a woman working at a laptop.

Electronic Fee Renewal Notification for Mailers or BSA

6

30 days before fee expires, Mailer will receive E-mail indicating which permits and fees are due

Fri 7/19/2019 3:01 AM
 info@uspspostalone.com
 PostalOne! Fee Due Date Notification.

To: Janelli, Maggie - Arlington, VA - Contractor
 Retention Policy: Inbox - 60 Days (60 days) Expires: 9/17/2019
 You forwarded this message on 7/19/2019 9:46 AM.

Dear Customer,

Fees for the following permit(s) will be due in 30 days.

| Permit No | Permit Type | Post Office of Permit | Permit Owner CRID | Fee Type |
|-----------|-------------|-----------------------|-------------------|------------------------|
| 176 | MT | Ballston, VA | 16818153 | Media Mail Presort |
| 176 | MT | Ballston, VA | 16818153 | Presorted Library Mail |

If you have a CAPS account, you may have your annual fees automatically deducted. Contact the CAPS Service Center at 1-650-377-1334 or ssmctas@email.usps.gov for more information. If you are a Full-Service mailer, you can now pay your annual fees at any retail unit that supports PostalOne! transactions. Other customers may pay their fees at the retail unit that supports their local Business Mail Acceptance site.

This email has been automatically sent from the USPS *PostalOne!* web server. Do not reply directly to this email.

Discussion Topics

Discussion Topics

Full-Service

- **First: Full-Service discount is applied to the postage**
- **Second: Informed Delivery discount is applied to the remainder postage**

Seamless

- **Seamless mailings are eligible**
- **Mailings are validated at Ready-To-Pay & warnings are sent to submitter**
- **Mailings that fail promotion validation at Finalization are processed for Auto-Finalization without the promotion**

Comingled

- **Comingled mailings are eligible for the promotion**
- **Validation is executed at the Mailpiece Version that links with the ID promotion Component**
- **Mailings must keep Eligible and Ineligible mailings in separate Components and in separate Mailpiece Unit Versions**

Continuous

- **Continuous mailings are eligible as long as validations pass at Ready-To-Pay & at Finalization**
- **Validations are executed on IMbs in a Mailpiece Unit Version (1% mismatch allowed for MCP campaigns)**
- **Option – Submit campaign as part of eDoc (Link relevant Components/Versions to campaigns)**

MID Level

- **MID Level campaigns can be used to qualify for Promotion**
- **MID Level campaigns can be created at the Mailer Campaign Portal**
- **MID Level campaigns can be created using Mail.dat RMR records (without any PDR or PBC records)**

Record Count

- **For campaign creation using Mail.dat or Mail.XML**
- **Campaign data for only two IMbs is sufficient to create a campaign with Start Serial and End Serial from the respective IMbs**

Campaign Duration

- **Running a campaign for the Course of the promotion duration (Sep 1 through Nov 30)**
- **Option 1 – Using MCP, create three consecutive campaigns with same MID & Serials, with consecutive dates**
- **Option 2 – Using PostalOne!, create one campaign for the duration of the promotion**

Triggers

- **[Ready-to-Pay] – MCP based Campaigns – Validations are executed at Ready-to-Pay, and if validated, campaigns are linked to postage statements**
- **[Finalize] – Linked campaigns are re-verified to be in Active or Submitted state**
- **[Ready-to-Pay] – eDoc based Campaigns – Validations are executed at Ready-to-Pay, and if validated, campaigns are linked to postage statements**

Performance Improvements

- **Today's Improved Informed Delivery Application**

- In preparation to the Informed Delivery Promotion, the Product Innovation team has worked closely with the IT group to upgraded both its infrastructure and mechanisms for interacting with mailers and customers
- The interface with PostalOne! has been streamlined and the Mailer Campaign Portal experience has been improved for mailer ease of use in campaign creation and reporting
- The process for creating Daily Digest emails containing mailpiece and campaign content has been enhanced to ensure campaign information is communicated timely

- **The future of Informed Delivery**

- In preparation for continued growth into the future, Informed Delivery plans to re-architect to meet the requirements of scale
- In pursuit of continued value creation for customers and increased interaction with mailers through the platform, additional features are planned for the Informed Delivery application

Potential Questions

- Postage Statements: Seamless Mailers are eligible to apply for the Informed Delivery (ID) Promotion but shall receive warnings upon submission if their discount is not approved. In some cases a discount may initially pass validation, but at the time of auto finalization fails and the discount is removed.
 - The Current system does not have infrastructure to send warnings post-submission (time of auto finalization) to mailers.
- MID Level Mailings: MID level mailings can be used to request the ID promotional discount. MID level campaigns can be created using Mailer Campaign Portal (MCP) or PostalOne! Mail.dat application.
 - Mailer Campaign Portal (MCP): require that the Start and End Serial numbers of IMbs be left blank
 - PostalOne!: requires that Mail.dat jobs, that do not contain piece level data, to connect the Referenceable Mail Record (RMR) to the Component Record (CPT)
- Campaigns for entire promo period: If a mailer wishes to run a campaign through the entire 3 month promo period, a campaign submitted through PostalOne! can be created to span that time period or consecutive campaigns submitted through the MCP, which has a 45 day duration limit, can be created
- Flat mailers losing discounts after the fact due: If scans are not processed for flats and a mailer does not receive their promotional discount, the Program Office is able to review claims and award withheld discounts on a case-by-case basis

Flats - Ineligible Mail:

- Non-automation mail (letters, postcards, and flats)
- Saturation mail flats
- Destination Delivery Unit (DDU) flats¹
- CR-RT 5-Digit Pallets flats¹
- Every Door Direct Mail (EDDM) letters, postcards and flats
- Detached Address Label/Detached Marketing Label flats
- Business-to-Business or Business-to-Institution/Campus mailings
