COMPLETED: PostalOne! System Release 49.0.2.1

Today (Sunday, **August 4, 2019**), the United States Postal Service implemented a software change:

- *PostalOne!* System Release 49.0.2.1

This was a rolling release; and the *PostalOne!* System remained available.

PostalOne! System Release 49.0.2.1 was an expedited release that updated Mail.dat to correct a mapping issue resulting from a rate type check that was added in the July 28 *PostalOne!* System release. The check prevented some extra services from mapping correctly to the Extra Services "S" lines on the postage statement. Resolution of this issue involved a background data setting and did not require an updated Mail.dat client or any user interface changes.
