2019 Emerging Technology Promotion

Emerging and Advanced Technology Promotion

Promotion Dates: March 1, 2019 – August 31, 2019

As of September 1, 2019:

- Participants – 286
- Volume – 4,722 M
- Revenue – \$989 M
- Final Surveys sent out September 17th (survey response rate currently 35%)

Post Promotion Analysis: 2019 vs. 2017 – 8% volume decrease (440M pieces)

- Decrease in top mailer participation: Several top mailers from 2017 did not participate in 2019 and some had significant volume declines (30 – 50%)
- At CRID level, more drop outs (233) than new participants (99)
- At CRID level, repeat participants were more likely to decrease volumes (57%) in 2019 than increase (43%)

Earned Value Promotion

Last Day to use credits: December 31, 2019 (Credit Acceptance/Redemption Period began July 1, 2019)

Enrollment – 557 participants (907 CRIDs total)

- 642 CRIDs were repeat participants
- 272 or 642 repeat participant CRIDS qualified for a rebate (42%)

Credit Use: 69% of released credits have been used by participants

A recent update to the Mailer Campaign Portal has changed how mailers access post-campaign reports.

Mailer Campaign Portal (MCP) Release Updates

Post-campaign report performance improvement was released on **Thursday, October 24th, 2019**:

- Mailers now receive post-campaign reports through “batch reporting” in the Mailer Campaign Portal. This allows for Post-Campaign Summary and Post-Campaign Detailed reports to generate daily overnight rather than be generated on-demand by mailer request.

Rules for Campaign Submission

PostalOne! validates **all data fields** as part of the campaign submission process.

The following business rules **must be followed** when submitting an Informed Delivery campaign using *PostalOne!*:

- **When using the PDR or PBC linkage, the *Container Quantity (CQT) Database ID is required as part of the RMR data set.*** This CQT Database ID in the RMR allows mailers to bypass validations for the RMS and RMR parent-child relationship. This allows for transmittal of a subset of RMRs with the Mail.dat job, which usually takes place when a mailing is being mailed across multiple days.
- Campaign data in the RMR data set can be updated up until the associated Containers (CSM Container Status records) are set to “R” for Ready-to-Pay (USPS Processing Due (UPD) status) in the CSM file.
- If RMR and RMS files are submitted as part of the original eDoc submission, these files do not need to be submitted again when the container statuses in the CSM are set to “R” for Ready-to-Pay.
- Mailers can provide **Campaign Start and End Dates** as part of the **Container Summary (CSM) record** for the pieces in a container; however, ***keep in mind that the Campaign Start and End Dates in the CSM record take precedence over those provided in the RMS record.***

Market Test of potential new Marketing Mail product (Plus One) for Marriage (or Shared) mail market segment

Plus One is an additional mailpiece (card) which is mailed with a saturation letter marriage mail “host” mailpiece at a lower price

- A means to maintain marginal territories while growing new ones which were not formerly profitable
- A “gateway” for small business to try solo mail at a lower price point
- Maintains and grows USPS Marketing Mail volume
- Operationally very efficient

Market Test

- Limits duration – up to two years from October 2019
- Provides ability to analyze market demand and price
- Four regions have been identified to test different prices from \$0.085 to \$0.10
- Allows USPS ability to stop test or proceed with new product at our discretion
