1.0 Introduction

On Friday, March 27, 2020, the United States Postal Service implemented the following software changes:

- Business Intelligence Database System (BIDS) Release 50.1.0.2

These Release Notes provide the contents of the release and affected subsystems.

The section titled **Corrections to Known Issues** is derived from External Trouble Reports (ETRs) and Engineering Change Requests (ECRs) for inclusion in this release.

This document is prepared based on the knowledge available at the time of its publication and any element may be subject to change prior to publication.

2.0 Business Intelligence Database System (BIDS) - Corrections to Known Issues

2.1 Mailer Scorecard

An issue was corrected to enable new eInduction Undocumented Container data to appear on the Mailer Scorecard detail reports. Previously, this data was missing when users drilled down on the Mailer Scorecard -- as eInduction Undocumented Container data was unavailable in the reporting tables from which it was being retrieved.

NOTE: This update was a background change; therefore, it did not affect the layout of the Mailer Scorecard or drill reports. [40-BI](#)

3.0 Document History

Date	Version	Section	Description
03/27/2020	Chg. 2.0	All	Updated to reflect post-deployment references
