1.0 Introduction

On Thursday, May 14, 2020, the United States Postal Service implemented the following software change:

- Package Platform Release 2.1.5.0

These Pre-Release Notes provide the contents of the release and affected subsystems.

The section titled **Corrections to Known Issues** is derived from External Trouble Reports (ETRs) and Engineering Change Requests (ECRs) for inclusion in this release.

This document is prepared based on the knowledge available at the time of its publication and any element may be subject to change prior to publication.

2.0 Package Platform – Corrections to Known Issues

2.1 Manifest Service

Beginning with this release, the Manifest Service added support for Electronic File **Type 2** for Manifested Returns. There was no change to existing support for Electronic File **Type 1**.

Previously, File **Type 1** was the only electronic file type supported. As a result, manifests for some Manifested Returns customers were unable to be processed because they used File **Type 2**. Packages not associated with a manifest file were priced as unmanifested. [1101-PI](#)
