

KNOWN ISSUES PostalOne! Release 51.0.0.0 June 14, 2020 External Report (updated 06/16/2020)								
Incident No. ALM No.	Date Detected	Date Added to List	Summary	System	Module	Priority	Resolution Date	Work-Around Description
5089832 ALM #14048	6/15/2020	6/15/2020	Upon submission of a Mail Piece Unit (MPU)/Component Relationship (.mcr) file, some users are receiving a system error: SEV2 - System error during validation of file with extension mcr using validator class gov.usps.mdr.validation.validate.scenario.PermitValidator. Reference Work-Around →	PostalOne!	Mail.dat	Medium	6/28/2020	Users should contact the <i>PostalOne!</i> Help Desk via eMail (postalone@usps.gov) to receive a modified client download which will resolve this system error. NOTE: This modified client will also be deployed as an optional client with <i>PostalOne!</i> System Release 51.0.1.0 scheduled for June 28, 2020.
5089783	6/15/2020	6/15/2020	Some users reported their Seamless jobs were not auto-finalizing. Root cause was identified to be within the Java scheduler responsible for checking the status of the EPS account balance. The system was unable to call the API to perform these checks resulting in a fatal error during auto-finalization. Impact was limited to future mailing of Seamless job.	PostalOne!	POEPSQueue	Medium	6/16/2020	System issue RESOLVED. Jobs can successfully be manually finalized. Same day auto-finalization not impacted.
