## 1.0 Introduction

On Thursday, December 10, 2020, the United States Postal Service implemented the following software change:

- Package Platform Release 2.3.3.2

These Release Notes provide the contents of the release and affected subsystems.

The section titled **Corrections to Known Issues** is derived from External Trouble Reports (ETRs) and Engineering Change Requests (ECRs) for inclusion in this release.

This document is prepared based on the knowledge available at the time of its publication and any element may be subject to change prior to publication.

## 2.0 Package Platform – Corrections to Known Issues

### 2.1 Data Services

- Package Platform Data Services resolved a timing issue in order to ensure pricing notification details are able to be saved consistently. Previously, when pricing notification details from multiple sources for the same package scan group ID arrived at the same time, they were not always able to be updated in the database due to the timing conflict. [1377-PI \(3402-PR\)](#)
- Data Services revised the strategy for running the process that updates mailers' subscription preferences. This prevents mailers from missing pricing notification data in their data feeds. Prior to this update, there was a potential that some items which were successfully priced could be missing the corresponding pricing notification in the data feed. [1378-PI \(3403-PR\)](#)

### 3.0 Document History

Date	Version	Section	Description
12/10/2020	2.0	All	Updated to reflect post-deployment status
