## 1.0 Introduction

On Thursday, May 20, 2021, the United States Postal Service implemented the following software change:

- Package Platform Release 2.5.1.0

These Release Notes provide the contents of the release and affected subsystems.

The section titled ***Corrections to Known Issues*** is derived from External Trouble Reports (ETRs) and Engineering Change Requests (ECRs) for inclusion in this release.

This document is prepared based on the knowledge available at the time of its publication and any element may be subject to change prior to publication.

## 2.0 Package Platform – Corrections to Known Issues

### 2.1 Data Services

Package Platform Data Services resolved an intermittent issue that prevented data files being sent to mailers whose preferred transmission protocol was SFTP (Secure File Transfer Protocol). Previously, mailers were sometimes unable to get their files at the expected time and had to use the “Resend” functionality on the Informed Visibility – Mail Tracking and Reporting (IV-MTR) data feed portal.
