1.0 Introduction

On Thursday, September 2, 2021, the United States Postal Service implemented the following software change:

- *PostalOne!* System Release 53.0.1.1

These Release Notes provide the contents of the release and affected subsystems.

The sections titled ***Corrections to Known Issues*** are derived from External Trouble Reports (ETRs) and Engineering Change Requests (ECRs) for inclusion in these releases. This document is prepared based on the knowledge available at the time of its publication and any element is subject to change prior to the release.

2.0 Mail.dat Client Support

Please note the following regarding the Mail.dat client download.

There is **no** new Mail.dat client with this release. Users should continue to use Mail.dat client **53.0.0.0_PROD**, which was required with *PostalOne!* System Release 53.0.0.0 on August 15, 2021. Mail.dat client 53.0.0.0_PROD can be downloaded from the Business Customer Gateway (BCG) using the following path: Mailing Services ➔ Electronic Data Exchange [Go to Service] ➔ Mail.dat download (Windows 32-bit, Windows 64-bit or Solaris).

3.0 *PostalOne!* System - Corrections to Known Issues

3.1 Postage Statement Processing

An issue was corrected to ensure that accurate incentive piece counts are consistently being shown for mailings claiming incentives. Previously, some large mailing submissions claiming incentives displayed an incentive piece count that was higher than the actual piece count. This was a display issue only; the actual incentive amount was calculated correctly. 14721

3.2 Transaction Processing

The *PostalOne!* System was updated to provide the total postage amount for Commercial Package Intercept (CPI) transaction requests that are sent to the Enterprise Payment System (EPS) so that they can be processed. Previously, this value was missing for CPI transactions due to a defect that was inadvertently introduced in *PostalOne!* System Release 53.0.0.0 on August 15, 2021. The missing total postage amount generated a database error when processing was attempted. As a result, CPI transactions submitted on or after August 15, 2021 were unable to be processed by EPS. 14720

4.0 Document History

Date	Version	Section	Description
09/02/2021	3.0	All	Updated text to reflect post-deployment status
09/01/2021	2.0	All	Removed DRAFT watermark
