#### **Authorization and Fees**

The Postal Service requires applicants to complete a PS Form 6805 QBRM application and submit it to the postmaster or Manager, Business Mail Entry. You may include samples of actual reply mailpieces with your QBRM application. Contact your postmaster, mailpiece design analyst, or business mail entry personnel for more information.

The Business Reply Mail (BRM) format standards are more stringent under QBRM (see DMM 505.1). In addition to meeting the requirements for pre-barcoded BRM, the reply mail permit holder must also:

- Maintain and pay for BRM through a Business Reply Mail advance deposit account (accounting fee required).
- Meet all design requirements for automation-compatible mailpieces, including the aspect ratio.
- Request a unique ZIP+4 and corresponding barcode for each postage category of BRM.
- Complete PS Form 6805 QBRM application and submit samples.

#### Intelligent Mail Barcode Accounting (IMbA)

Qualified Business Reply Mail (QBRM) is Business Reply Mail that utilizes the enhanced processing capability of Intelligent Mail barcode Accounting (IMbA) to reduce processing times and ensure QBRM mailers receive reply mail and invoices quickly.

IMbA is an automated solution for the counting, rating, invoicing, and billing process. Using the Intelligent Mail barcode (IMb) on a mailpiece allows mailpiece counts based on processing equipment scans to be linked to the mailer and sent directly to PostalOne!®. IMbA's benefits include:

- Automated invoicing
- Improved consistency

- Expedited processing
- Future reporting enhancements

#### ■ IMbA Parallel

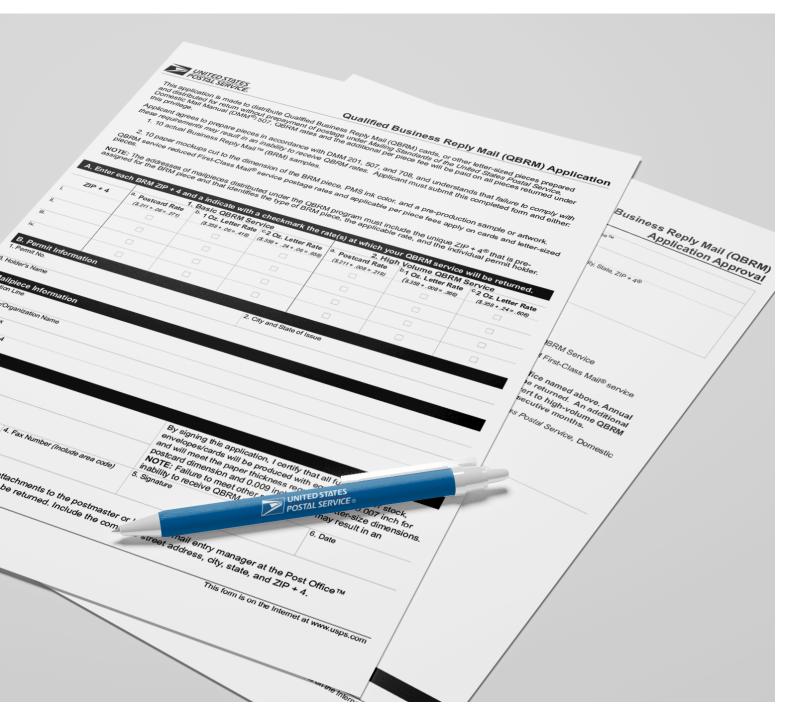

The IMbA Parallel phase is a period of time before IMbA invoicing for the destination goes live. It provides time for USPS to review the initial mailpiece scans to ensure that there are no anomalies that might affect the accuracy of the counts being sent to PostalOne!.
