

January 2024 Release Overview

Proposed January 2024 Changes

CHANGE 1.0

DEPLOYMENT: 1/9/2024

EFFECTIVE: 1/21/2024

This document describes changes being considered for the next structural implementation. The document is prepared based on the knowledge available at the time of printing and any direction found herein is subject to change prior to the release. The contents of this document are pre-decisional, and subject to change based on Board of Governors and Postal Regulatory Commission decisions.

Document last updated: October 17, 2023

1.0 Introduction

This document includes planned changes under review for the next pricing structure release scheduled for January 2024. The document is prepared for the mailing software industry based on the knowledge available at the time of printing and any direction found herein is subject to change, including additional structure changes prior to the release. The contents of this document are pre-decisional and subject to change.

Draft postage statements marked with revisions will be posted to Postal Explorer [Welcome | Postal Explorer \(usps.com\)](#) as they become available.

General Changes

2.0 Fully Implement Zone Collapse for Periodicals for "All Other"

On July 9, 2023 the Postal Service collapsed the Pound rates for zones for Outside County Periodicals into an "All Other" category. The *PostalOne!* System postage calculation will be updated to fully implement these "All Other" prices. In addition, the DMM will be updated so that "All Other" Periodicals pricing does not include zone-based rounding or calculations.

- Online Reporting: No Impact
- Data Feeds: No Impact
- Postage Statement and SKU Changes: No Impact
- Mail.dat: Yes – Use existing rate ingredients. No change to specification. Will not require zone information for the calculation of periodical postage.
- Mail.XML: Yes – Use existing rate ingredients. No change to specification. Will not require zone information for the calculation of periodical postage.
- Shipping Services File (SSF) Changes: No Impact
- Indicum Creation Record (ICR) File: No Impact
- WebTools: No Impact
- USPS API: No Impact
- Price Change Type / Product Type: Market Dominant

Market Dominant Changes

3.0 First-Class Mail Incentive

The US Postal Service is planning an incentive for Commercial First-Class Mailers. The proposal includes a Registration Period, followed by an Incentive Period (earn postage credits), a Review & Acceptance Period, and a Postage Credit Redemption Period.

During the Registration Period (November 2023 through June 2024), mailers register through the Promotions Portal. At the time of registration, all CRIDs associated with the mailer are enrolled and mailer identifies permit to redeem postage credits. The baseline is commercial First-Class Mail volume (letters, postcards, and flats) from Fiscal Year (FY) 2023.

The Incentive Period extends from January 1, 2024, through December 31, 2024. Mailers will receive a postage credit of 30% on incremental First-Class Mail volume that is greater than their baseline volume. Mailers who mailed less than one million pieces in FY2023 must mail at least one million pieces in Calendar Year (CY) 2024 before they can start earning the postage credit.

During the Review and Acceptance Period, postage credits will be dispersed to the redeeming permit. The postage credits are based on the actual average postage paid during the entire Incentive Period on the volume of all included Commercial First-Class Mail categories that exceed the baseline at the end of June 2024 and quarterly thereafter. For the period between January and June 2024, postage credits will be distributed in July 2024. For the period between July and September 2024, postage credits will be distributed in October 2024. For the period of October through December 2024, the final postage credits will be distributed in February 2025.

The Postage Credit Redemption Period starts in CY2024, and any unused postage credits must be redeemed by December 31, 2025. Mailers may use the earned and issued postage credits anytime during the Redemption period. Mailers redeem postage credits by claiming on a postage statement or by providing the incentive characteristic electronically.

FY23 Volume	Qualify for the incentive	Earn the incentive	Use the incentive
> 1,000,000	<ol style="list-style-type: none"> 1) Select all CRIDs for the mail owner to determine baseline volume 2) FCM volume includes commercial letters, flats, postcards 3) CY24 must be > FY23 baseline volume to qualify 	<ol style="list-style-type: none"> 1) CY24-calendar year (Jan 2024-Dec 2024) 2) Incentive postage credit distributed July 2024, October 2024 and the final true-up is February of 2025 	<ol style="list-style-type: none"> 1) May start using in CY24 after postage credit is distributed 2) Postage credits expire December 2025 3) Mailer uses FG in mail.dat and mail.XML files to claim the incentive, mailers redeem credits by claiming on a postage statement
< 1,000,000	<ol style="list-style-type: none"> 1) Select all CRIDs for the mail owner to determine baseline volume 2) FCM volume includes commercial letters, flats, postcards 3) CY24 must be > 1,000,000 pieces to start earning postage credits 	<ol style="list-style-type: none"> 3) Postage credits can only be earned on First-Class Mail 4) Postage credit of X% on incremental commercial First-Class Mail volume [pieces that exceed the volume to qualify] 	<ol style="list-style-type: none"> 4) Postage credits earned can only be used on future First-Class Mail mailings

Table 1 – First-Class Mail Incentive Summary

Table is for reference only.

- Online Reporting: No Impact
- Data Feeds: No Impact
- Postage Statement and SKU Changes: No Impact – Use existing “Incentive/Discount Claimed” section to document the incentive claimed.
- Mail.dat: Yes, the Component Characteristics Record file (.CCR) must be included with a .ccr Characteristic (CCR-1002) value of FG = First-Class Mail Incentive and .ccr Characteristic Type (CCR-1005) value of I = Incentive to claim the credit.
- Mail.XML: Yes, on the PostageStatementCreateRequest the characteristicIncentiveType must be included with a value of FG = First-Class Mail Incentive to claim the credit.
- Shipping Services File (SSF) Changes: No Impact
- Indicum Creation Record (ICR) File: No Impact
- WebTools: No Impact
- USPS API: No Impact
- Price Change Type / Product Type: Market Dominant

4.0 Marketing Mail Incentive

The US Postal Service is planning an incentive for Marketing Mail Mailers. The proposal includes a Registration Period, followed by an Incentive Period (earn postage credits), a Review & Acceptance Period, and a Postage Credit Redemption Period.

During the Registration Period (November 2023 through June 2024), mailers register through the Promotions Portal. At the time of registration, all CRIDs associated with the mailer are enrolled and mailer identifies permit to redeem credits. The baseline is Marketing Mail volume (letters, flats, and packages) from Fiscal Year (FY) 2023.

The Incentive Period extends from January 1, 2024, through December 31, 2024. Mailers will receive a postage credit of 30% on incremental Marketing Mail volume that is greater than their baseline volume. Mailers who mailed less than one million pieces in FY2023 must mail at least one million pieces in Calendar Year (CY) 2024 before they can start earning the postage credit.

During the Review and Acceptance Period, postage credits will be dispersed to the redeeming permit. The postage credits are based on the actual average postage paid during the entire Incentive Period on the volume of all included Marketing Mail that exceed the baseline at the end of June 2024 and quarterly thereafter. For the period between January and June 2024, postage credits will be distributed in July 2024. For the period between July and September 2024, postage credits will be distributed in October 2024. For the period of October through December 2024, the final postage credits will be distributed in February 2025.

The Postage Credit Redemption Period starts in CY2024, and any unused postage credits must be redeemed by December 31, 2025. Mailers may use the earned and issued postage credits anytime during the Redemption period. Mailers redeem postage credits by claiming on a postage statement or by providing the incentive characteristic electronically.

FY23 Volume	Qualify for the incentive	Earn the incentive	Use the incentive
> 1,000,000	<ol style="list-style-type: none"> Select all CRIDs for the mail owner to determine baseline volume MM volume includes letters, flats, parcels CY24 must be > FY23 baseline volume to qualify 	<ol style="list-style-type: none"> CY24-calendar year (Jan 2024-Dec 2024) Postage credits distributed July 2024, October 2024, the final true-up is February of 2025 	<ol style="list-style-type: none"> May start using in CY24 after postage credit is distributed Postage credits expire December 2025 Mailer uses MG in mail.dat and mail.XML files to claim the incentive, mailers redeem credits by claiming on a postage statement
< 1,000,000	<ol style="list-style-type: none"> Select all CRIDs for the mail owner to determine baseline volume MM volume includes letters, flats, parcels CY24 must be > 1,000,000 pieces to start earning postage credits 	<ol style="list-style-type: none"> Postage credits can only be earned on MM Postage credit of X% on incremental Marketing Mail volume [pieces that exceed the volume to qualify] 	<ol style="list-style-type: none"> Postage credits earned can only be used on future Marketing Mail mailings

Table 2 – Marketing Mail Incentive Summary

Table is for reference only.

- Online Reporting: No Impact
- Data Feeds: No Impact
- Postage Statement and SKU Changes: No Impact – Use existing “Incentive/Discount Claimed” section to document the incentive claimed.
- Mail.dat: Yes, the Component Characteristics Record file (.CCR) must be included with a .ccr Characteristic (CCR-1002) value of MG = Marketing Mail Incentive and .ccr Characteristic Type (CCR-1005) value of I =

Incentive to claim the credit.

- Mail.XML: Yes, on the PostageStatementCreateRequest the characteristicIncentiveType must be included with a value of MG = Marketing Mail Incentive to claim the credit.
- Shipping Services File (SSF) Changes: No Impact
- Indicum Creation Record (ICR) File: No Impact
- WebTools: No Impact
- USPS API: No Impact
- Price Change Type / Product Type: Market Dominant

5.0 Certificate of Mailing – Extra Services Automated Solution

The US Postal Service is considering automating Extra Services forms for Letters and Flats mailings associated with Certificates of Mailings, including USPS Bulk Certificate of Mailing Domestic (PS Form 3606-D); USPS Certificate of Mailing – Firm Domestic (PS Form 3665-D); and USPS Firm Book for Accountable Mail (PS Form 3877).

Automating the Certificate of Mailing process will greatly reduce form complexity, reduce use of paper forms, digitize certifications, and enhance security of the Certificate of Mailing data exchange. The US Postal Service is proposing two ways of submitting the electronic Certificate of Mailing data, 1) Mail.dat, or 2) CSV file uploaded through Business Customer Gateway (BCG).

- Online Reporting: Will reflect Certificate of Mailing fee(s).
- Data Feeds: Will reflect Certificate of Mailing fee(s).
- Postage Statement and SKU Changes: No Impact
- Mail.dat changes: Yes – The proposal includes the addition of four new Certificate of Mailing (COM) records: COM Header, COM Detail, COM Bulk Header, COM Services. The Mail.dat client will be used to load this data to *PostalOne!* System and send the PDF of the form back to the submitter. The following files are proposed to be supported for this initiative (see Appendix A for additional details). One or more of these files may be required to support the various automated forms and implementation details will be published in the mail.dat technical specification guide.

File Type	File Description	PS Form 3665 Certificate of Mailing	PS Form 3606-D Bulk Certificate of Mailing	PS form 3877 Firm Book for Accountable Mail
COM Header	Header of the Certificate of Mailing (identifying the different types of Certificates of Mailings)	Required	Required	Required
COM Detail	Details of the COM such as Recipient Addresses	Required		Required
COM Bulk	Used for Bulk Certificate of Mailing		Required	
COM Services	Used to identify the Extra Services for Accountable Mail			Optional

Table 3 – COM Files and Scenarios

Table is for reference only.

- Mail.XML changes: No Impact
- Shipping Services File (SSF) Changes: No Impact

- Indicium Creation Record (ICR) File: No Impact
- WebTools: No Impact
- USPS API: No Impact
- Price Change Type / Product Type: Market Dominant

6.0 Promotion Eligible Product Identification

The US Postal Service is considering offering mailers reporting on six promotions (Tactile, Sensory, and Interactive; Personalized Color Transpromo; Emerging Technology; Reply Mail Intelligent Mail Barcode Accounting (IMbA); Informed Delivery; and Retargeting). Mailers who submit a postage statement(s) must claim the promotion discount by using the applicable Component Characteristics Record (CCR) code and ensure their submission meets the *PostalOne!* System validation. The proposed updates will enable mailers to see promotion discounts at the product level (for each promotion).

- Online Reporting: Mailers and Mail Service Providers may view current rate case information for all promotions online and may automatically receive/process Pricing SKU data to calculate postage statements.
- Data Feeds: No Impact
- Postage Statement and SKU Changes: New value (SKU Match Code) to identify and assign unique values to promotion/incentive eligible products.
- Mail.dat changes: Use existing code for eligible products
- Mail.XML changes: Use existing code for eligible products
- Shipping Services File (SSF) Changes: No Impact
- Indicium Creation Record (ICR) File: No Impact
- WebTools: No Impact
- USPS API: No Impact
- Price Change Type / Product Type: Market Dominant

7.0 Ballot Mail Service Type ID (STID) Revision

The US Postal Service is considering retiring and removing Ballot Mail STIDs 719, 724, 739, 745, and 740 as an option for mailers. The Full-Service Service Type ID (STID) verification (for Full-Service mailings) will be updated and use of the decommissioned STIDs will result in STID errors.

Note: there is no change to the Full-Service STID error threshold; it will continue to stay at 2%.

- Online Reporting: Yes – Mailer scorecard will report the usage of the decommissioned STIDs as errors.
- Data Feeds: Yes – Data feeds for Mailer Scorecard will include the errors originated from the use of the decommissioned STIDs.
- Postage Statement and SKU Changes: No Impact
- Mail.dat: Yes – Mail.dat application will update the existing warnings to include the usage of decommissioned STIDs
- Mail.XML: Yes – Mail.XML application will update the existing warnings to include the usage of decommissioned STIDs.
- Shipping Services File (SSF) Changes: No Impact
- Indicium Creation Record (ICR) File: No Impact
- WebTools: No Impact
- USPS API: No Impact
- Price Change Type / Product Type: Market Dominant

Competitive Changes

8.0 Eliminate Parcel Select Lightweight and Update Parcel Select Rate Tables

The US Postal Service is considering eliminating the current Parcel Select Lightweight (PSLW) and adding price categories of quarter, half, and three-quarter pound increments to the current destination entry pricing under Parcel Select.

- Online Reporting: Will reflect Parcel Select only.
- Data Feeds: Will reflect Parcel Select only.
- Postage Statement and SKU Changes: Yes – USPS Package Services and Parcel Select Regular (PS Form 3605-R) – The “Part E – Parcel Select Lightweight Parcels” will be removed from the statement. The packages that are light weight (up to 15.999 oz) will map to the “Part C – Destination Entry.”
- Mail.dat changes: Yes – the MPU Mail Piece Unit – Rate Type and CPT Component – Rate Type values of P will no longer be supported. Instead, the jobs would require ingredients to map to Parcel Select Destination rates.
- Mail.XML changes: Yes – The Mail Class or FormType of PS with RateCategory value of S, P7, G, PM, and RateLevel of P will no longer be supported. Instead, the jobs would require ingredients to map to Parcel Select Destination rates.
- Shipping Services File (SSF) Changes: Yes – The rate ingredients for Parcel Select Lightweight will be removed (for a given period of time they will be remapped to Parcel Select Destination Entry). Intelligent Mail package barcode (IMpb) Compliance may be assessed for packages that are not manifested with correct rate ingredients. See Appendix B for additional details on rate ingredients.
- Indicum Creation Record (ICR) File: Yes
- WebTools: Yes – Impacts RateV4, EVS APIs, Parcel Select Lightweight Parcel DNDC and Parcel Select Lightweight Parcel DSCF, Parcel Select Lightweight Parcel DDU, and Parcel Select Lightweight Parcel 5-Digit DHUB would be removed from the PSLW rate ingredients.
- USPS API: Yes – Changes to the Domestic Labels, the Domestic Prices, and Service Standards APIs to remove ‘PARCEL_SELECT_LIGHTWEIGHT’ as an enumerated mail class.
- Price Change Type / Product Type: Competitive

9.0 Applicable Technical Specifications

9.1 2.1 Updates to *PostalOne!* eDoc Specification Versions Support

9.1.1 2.1.1 Mail.dat eDoc

The below table depicts the Mail.dat specification versions that will be supported with the January 2024 release.

<i>PostalOne!</i> Mail.dat (eDoc) Version Support			
Versions	Versions Supported Prior to Deployment Date	Versions Supported Deployment Date to Price Change Effective Date	Post-Price Change – Versions Supported on and after Price Change Effective Date
22-1	Supported	Supported	Supported – for updates only
23-1 (<i>New Errata</i>)	–	Supported	Supported
24-1	–	Supported	Supported

*Final version(s) of Mail.dat to be supported will be determined based on discussion with DTAC

Table 4 - PostalOne! Mail.dat (eDoc) Version Support

Note: There is a new required Mail.dat client with this release. Users should download the new Mail.dat client from the Business Customer Gateway (BCG) using the following path: Mailing Services > Electronic Data Exchange [Go to Service] > Mail.dat download (Windows 32-bit, Windows 64-bit or Solaris).

9.1.2 2.1.2 Mail.XML eDoc

The below table depicts the Mail.XML specification versions that will be supported with the January 2024 release.

PostalOne! Mail.XML (eDoc) Version Support			
Versions	Versions Supported Prior to Deployment Date	Versions Supported Deployment Date to Price Change Effective Date	Post-Price Change – Versions Supported on and after Price Change Effective Date
25.2	Supported	Supported	Supported – for updates only

Table 13 – Future State Parcel Select Destination Entry

Table is for reference only.

DRAFT

12.0 Document History

Date	Section	Description
8/11/2023	All	V1.0 Posted
8/14/2023	1.0	Added "General Changes" section
8/22/2023	11.0	Updated Technical Specifications tables
8/22/2023	6.0	Removed USPS Marketing Mail Parcels Clarification
8/25/2023	10.0	Updated Technical Specification tables
8/25/2023	4.0	Updated language to include "Domestic" description
8/25/2023	7.0	Added "Ballet Mail STID Table Revision"
9/14/2023	Appendix B	Added rate ingredient table including STCs
10/17/2023	3.0 and 4.0	Included credit percentage
