

To ensure die-cut visibility for Informed Delivery[®] recipients, the leftmost edge of the die-cut extension must be in Zone C of the TED-C Letter Template. If the die-cut extension's leftmost edge is not in ZONE C, it may be acceptable to mail, but there may not be any visibility of the die-cut in Informed Delivery[®] for recipients.

In EXAMPLE 1 the leftmost edge is in Zone C. In this case, the die-cut extension will be visible for recipients using Informed Delivery[®]

In EXAMPLE 2 the leftmost edge is NOT in Zone C. In this case, the die-cut extension will NOT be visible for recipients using Informed Delivery[®]
