

LICENSING ANNOUNCEMENT

APRIL 19, 2016

Issues with the Zero Table

Primary Audience: NCOA^{Link}® MPE Data Users

The Zero Table (release number 1233) that was posted to the Electronic Product Fulfillment (EPF) website on Monday, April 18 is corrupt. The file has been removed from EPF and a new file will be reposted once available.

If you have already downloaded the file, please uninstall and do not use. Revert back to release number 1232 and use it with the appropriate NCOA^{Link} data for release 1232 until the updated file is reposted to the EPF website. Remember the Zero Table and NCOA^{Link} data must be in sync and cannot be used with different release numbers.

If you have any questions, contact the Licensing Department at 800-589-5766 or ncoalink@usps.gov.
