NOTE: The information in this document concerns planned revisions that are not historical facts. Actual results may differ from these forward-looking statements.

ALM Index

1.0 Introduction

On Sunday, November 5, 2017, the United States Postal Service will implement the following software change(s):

- *PostalOne!* System Release 46.0.1.0

These Pre-Release Notes provide the contents of the release and affected subsystems.

The sections titled **Corrections to Known Issues** are derived from External Trouble Reports (ETRs) and Engineering Change Requests (ECRs) for inclusion in these releases.

This document is prepared based on the knowledge available at the time of its publication and any element may be subject to change prior to publication.

2.0 Mail.dat Client Support

There is no new Mail.dat client version with this release. Users should use Mail.dat client version 46.0.0.0_PROD.

The current Mail.dat client may be downloaded from the Business Customer Gateway (BCG) using the following path: Mailing Services ➔ Electronic Data Exchange [Go to Service] ➔ Mail.dat download (Windows 32-bit, Windows 64-bit or Solaris).

3.0 *PostalOne!* System - Corrections to Known Issues

3.1 Electronic Data Exchange

For Periodicals (PS Form 3541) submitted by Mail.XML, processing will be updated to correctly calculate the In-County price for Periodicals postage statement lines A1 and A2. Currently, Mail.XML processing is incorrectly subtracting the advertising pounds from the Section A pound lines. 11659 (19151-R)

3.2 Full-Service MicroStrategy Reports

Performance will be improved for the procedures that populate the Nesting Sampling Validation metrics on the Mail Owner/Mail Preparer Scorecard. Currently, these procedures sometimes fail due to slow performance. As a result, the Nesting Sampling Validation metrics are not refreshed with new data on days when the procedures fail. 11650

3.3 Postal Wizard

- The Simplified Postal Wizard Mail Owner/Account Holder Search functionality will be updated to include results for Cost Center types Business Mail Entry Unit (BMEU), Detached Mail Unit (DMU), and Satellite (SAT) facilities. 11662 (19155-R)

- This only applies to the Testing Environment for Mailers (TEM). The Simplified Postal Wizard interface will be updated to correct an issue that is currently generating a blank page in place of the Summary page when users click Next on the Rates page while entering a postage statement in the TEM environment. 11654 (19152-R)
